

NATIONAL DOCTOR'S DAY

The difficult times amid COVID-19 have once again reminded us about the contributions and sacrifices made by doctors and the healthcare staff around the globe on a daily basis. In honour of this noble profession, Doctor's Day is celebrated on different dates across the world.

India celebrates the day on July 1 as 'National Doctor's Day' and it's organised by the Indian Medical Association (IMA) annually.

This year is once again dedicated to all those doctors and healthcare professionals who are serving in these trying times by risking their lives either in primary as well as secondary care setups or in dedicated COVID care facilities.

Wishing for all the doctors to stay healthy and safe!
